

G-Garden Chain&Bar

High Performance Chain and Bar Oil

G-Garden Chain&Bar is premium quality adhesive oil designed to lubricate chain, bar guide and drive sprocket on chain saws. It is formulated with high quality mineral base oils and special additives to optimize performance and provide good wear protection and resistance to foaming. G-Garden Chain&Bar is suitable for use with all types of chain saws equipped with either hand-operated or automatic oilers.

Applications

- Chain saw bar and chain lubrication
- Guide bars and sprockets
- G-Garden Chain&Bar is not designed as chain saw engine lubricants; it could lead to serious wear and engine failures

Features	Advantages and Potential Benefits
Extra tackiness	High treat levels of tackiness additive lead to better retention of oil on the chain bar and drive sprockets.
Wear protection	Effective anti-wear agents reduce wear in the critical areas and optimize the life of the saw and its chain
Active cleaning agents	Special additives reduce the pitch build-up on the chain and drive sprocket, thereby reducing maintenance and down-time
Protection against rust and corrosion	Increased chain and guide bar life and reduced maintenance costs
Low pour point	Good flow ability even at low operating temperatures for higher efficiency

Typical Characteristics

Properties	Method	G-Garden Chain&Bar
Kinematic Viscosity @40°C, mm ² /s	ASTM D445	102,0
Kinematic Viscosity @100°C, mm ² /s	ASTM D445	11,2
Flash Point (COC), °C	ASTM D92	233
Pour Point, °C	ASTM D97	-30
Density @15°C, kg/m ³	ASTM D4052	889

Health, Safety & Environment

Information is provided for products in the relevant Safety Data Sheet (SDS). This provides guidance on potential hazards, precautions and first-aid measures, together with environmental effects and disposal of used products. SDS's are available upon request through your sales contract office. This product should not be used for purposes other than its intended use.
